The main problem with downloading Photoshop is that you will have to completely uninstall the current version of Adobe Photoshop before installing the new version. After downloading and installing, you can login to the Photoshop CC online version. On the Photoshop website you can find an installation file in the Help section. And if you have any question feel free to contact the support team.Gerald, I am sending you a copy of the latest update. I should have sent it to you a few weeks ago but forgot. It looks like we have done a pretty good job of selling on the calls.
